

Saw your visit on WKOW TV this morning and I want to comment.
Please do what ever in your means to stop the Bankers if at all possible. The No Call list has helped me and my family so much. As a guardian, my brother doesn't make good decisions, so he would sign up for anyone and it is very difficult to control him on with phone calls to his home. Then as as guardian I have to try to stop his actions with phone calls back, paperwork to prove I can make his decisions with much difficulty after he is gone along with a telemarketer sales pitch.(which is a inconvenience to me)
Next....having a elderly mother, she enjoys phone calls and she then will get up to answer phone calls and be angry that it was a telemarketing sales pitch and even more with a computerized telemarketer. Elderly seems to be a target for these situations as well as people who do not make decisions well and if we choose a No Call List, it should be the right of each household not the Banking community.
I support your efforts, keep up the good job you and your staff continue to do.
Best Regards,
Janice Oren
